Health Information Records Management
Health Studies
Addiction Services
Radiologic Technology

Business Education Partnership

HFM BOCES partners with The Fulton Montgomery Regional Chamber of Commerce to form the BUSINESS EDUCATION PARTNERSHIP (BEP). The BEP connects HFM BOCES school districts and programs with regional businesses to help support a well-prepared, capable and adaptable workforce. In turn, these partnerships can help improve student achievement and educational competitiveness.

Through this partnership, Chamber staff maintain a continued presence at the PTECH campuses, helping to facilitate a wide range of professional development opportunities for our students.

PROFESSIONAL SKILLS DEVELOPMENT - Through guest speakers, small group discussions and project-based learning initiatives, students are able to learn the professional skills needed to success in the real world.

INTERNSHIPS - All PTECH students are required to complete an internship with a local business in their related career pathway. These real-world experiences provide students an authentic look at the work environment and how to navigate it successfully.

WORKPLACE TOURS - Students regularly tour local businesses, allowing them to gain a deeper understanding of companies in our region and the job opportunities available to them.

WORKPLACE CHALLENGES - Students are given real-world challenges from local businesses in a collaborative, team-based environment, applying instructional content to technical workplace problems.

Get a jumpstart on your future!
